Re: 2017-2018 Employment Practices Liability (EPL) Program

95% of MEL members have adopted the MEL's model employment practices risk control program and are eligible for premium and deductible incentives. These programs must be updated every two years to remain eligible. PLEASE VISIT THE MEL WEBPAGE – NJMEL.ORG – FOR A COPY OF THE REVISED MODEL. Attached is a memorandum synopsis of the changes.

Members with updated loss control programs receive the standard EPL deductible of \$20,000 per claim plus a 20% co-pay capped at \$50,000 and may be eligible to buy down deductibles and co-insurance caps. (See note below concerning members with adverse EPL claims experience).

To qualify for the incentive, have your General Counsel or Employment Attorney complete the one page form checking the minimum requirements for updating the plan. It is not necessary to attach any further documentation. Mail the completed form to MEL Fund Office, 9 Campus Drive, Suite 216, Parsippany, NJ 07054.

Members that did not qualify for the 2015-2016 incentive must adopt the EPL loss control plan and submit to the MEL for review. Have your General Counsel or Employment Attorney complete the two-page form checking the minimum requirements for the plan. The following must be attached to this form: (1) the Personnel Policies and Procedures Manual, (2) the resolution adopting this manual, and (3) the Employee Handbook. Mail the completed form and attachments to the MEL Fund Office, 9 Campus Drive, Suite 216, Parsippany, NJ 07054.

Members submitting the required form by October 1, 2016 will qualify or continue to qualify for the deductible incentives effective January 1, 2017. Members submitting this form after the deadline will become eligible for the deductible incentive upon approval of the application, but not retroactively.

Members without updated loss control programs will have a deductible of \$100,000 per claim plus a 20% co-pay with no cap. (See note below concerning members with adverse EPL claims experience).

**Members with adverse EPL claims experience:** Members with adverse loss experience will have a deductible of \$75,000 if they have an updated loss control plan and \$150,000 if they do not – in addition to the co-pay (as outlined above). In a few cases, the insurance carrier will establish higher deductibles for members due to exceptionally poor experience.

**Public Official's Training Credit**: The MEL is continuing the public officials training throughout the state for elected public officials and authority commissioners. Sessions have already been given at the League Convention and the AEA Convention in Atlantic City. The MEL will reduce each member's 2016 liability premium by \$250 for each municipal elected official and authority commissioner who completes the course by May 1, 2016. The credit is also extended to the member's CEO (i.e. municipal manager/administrator or authority executive director). The maximum credit is capped at 25% of the member's liability claims fund. The MEL webpage will post a listing of courses scheduled throughout the state. In addition, the course can also be taken on-line through the MEL Safety Institute (direction attached).

#### **Required Elements for the Incentive**

- 1. Employment Attorney/Advisor: An Employment Attorney or an Employment Advisor usually provides advice concerning personnel matters. However, the member may designate its General Counsel if experienced in employment matters.
- 2. Personnel Policies and Procedures Manual: To facilitate this process, the MEL has developed a Model Personnel Policies and Procedure Manual that members are free to use at their discretion. Members can adopt the model, take sections from the model and place them in their existing personnel manual, or write their own policies that cover the subjects in the model.
- 3. Conscientious Employee Protection Act Notice: This notice (in both English and Spanish) must be posted on the bulletin board and distributed to all personnel. The notice required by the NJ Department of Labor is included in the Model Personnel Policies and Procedures Manual. (copy can also be found on the MEL webpage njmel.org)
- **4. Employee Handbook:** The handbook must be updated and distributed to all personnel. To facilitate this process, the MEL has developed a Model Employee handbook that members are free to use at their discretion. (which can be found on the MEL webpage nimel.org)
- **5. Model Local Unit Civil Rights Resolution (municipalities only):** Adopt the model resolution. (which can be found on the MEL webpage njmel.org)
- **6. Managerial and Supervisory Training:** Court decisions made personnel training for managerial and supervisory "mandatory". A signed acknowledgement that the manager or supervisor has completed training within the last 12 months must be placed in the personnel files. Training is also mandatory for the Municipal Judge, the heads of volunteer emergency service organizations such as Volunteer Fire Departments, EMS units, and the heads of organizations such as Library Boards and Planning Boards, etc., that are involved in personnel matters. The MEL has developed a Model that the local JIFs will conduct over the next 6 months. Your JIF will contact you with the details.
- 7. Police Chief, Captains and Lieutenants Training: Because Police Departments are involved in a high percentage of employment related litigation, Police Chiefs and at least one other command officer must complete employment-practices training that takes into

- consideration the Attorney General's guidelines for police operations. A schedule of these seminars will be distributed by your JIF.
- **8.** Training for All Other Personnel: Court decisions also require employers to offer antiharassment and related personnel training to all employees. This can be accomplished by requiring your employees to complete the 14-minute on-line Employee Orientation found on <a href="https://www.njmel.org">www.njmel.org</a>. Attached are the instructions to access this program.
- **9. MEL EPL Helpline:** The MEL includes a helpline to its members at no additional cost. Members are required to enroll (if you have not already done so) by calling 415-817-1611 or emailing <a href="mailto:bhansen@enquiron.com">bhansen@enquiron.com</a>.

For assistance, please contact the MEL office or the office of your local JIF.

This memorandum is intended to provide an overview of the changes to the Manual and accompanying documents. Members should amend their personnel manual accordingly. **Adopted Changes:** 

- A. Change One: Modification to Anti-Discrimination Policy/ American's with Disabilities Act Policy (Section 1 of Manual) and Employment Application to comply with the New Jersey Pregnant Worker's Fairness Act. The foregoing referenced policies and application were amended to comply with the New Jersey Pregnant Worker's Fairness Act, which amended the Law Against Discrimination to prevent discrimination based upon pregnancy, childbirth or pregnancy medial related condition. It also requires employers to provide reasonable accommodation.
- **B.** Change Two: Modification to the Social Media Policy portion of the Communication Media Policy (Section 2 of the Manual) to reflect changes in technology and practices of government. Note: In this section, we have a note provided by a member of the Committee. To accommodate his comments, we have also included alternative wording.
- C. **Change Three:** Addition of Employee Dating Policy to Section 2 of the Manual. This policy is adopted as an optional policy to require supervisor/subordinate dating to notify human resources.

- F. Change Six: Model Employment Application to be Compliant with Ban the Box Legislation. Therefore, we have eliminated the question from the standard job application.

The MEL is pleased to announce that S:ERVE - Safety: Emergency Responder Vehicle Education has been made available again to our members in 2016.

Traversing through intersections during emergency response is one of the most hazardous aspects of the job for emergency responders. S:ERVE is an on-line driver simulation and curriculum created to educate law enforcement, firefighters, EMS and other emergency responders to drive at their safest in emergency response scenarios in an effort to reduce collision rates.

This highly interactive on-line simulator guides users through a series of situations in which decision making is key. Users prioritize their vehicle handling and emergency task activities while experiencing situations related to typical emergency response or pursuit operations.

Three separate driver training modules are available for Police, Fire and EMS. An additional module on "Distracted Driving" was added to the program last year.

Please share the following information with your Police, Fire and EMS.

Instructions for accessing website are listed below.

- 1. Click on this link to access the Safety National Learning Management Center. http://serve.evoc101web.com
- 2. Enter your Class ID number.
- 3. Enter your Student Number (Please do not use Social Security Numbers or personal information.) Use the name of your City/ Borough/Town followed by a Station Number, radio designation number or badge number with the individual's three (3) **LOWER CASE** initials following. For example, format of the student number would be "Anytown1234abc". Note: This is important in order to generate town specific reports.
- 4. Enter First and Last Name.

Note: Individual trainees must use the same exact log-in information (Class ID, City/Borough/Town, student number, first name and last name) each time they log-in in order for the bookmarking feature to work and

produce an individual training record. Important – be sure to keep track of your log-in information as there is no automatic retrieval function for this element.

- 5. Complete all lessons. A final quiz must be answered after finishing Lesson 5.
  - Use a sign-in sheet to track attendance if completing the course as a group
  - Complete the test either individually or as a group
  - When all lessons have been successfully completed, a link will appear that says "View Certificate". When clicked, a Window will open with the certificate for printing. If the link cannot be accessed, you can also contact J. A. Montgomery Risk Control for blank certificates.
  - If training is completed in a classroom setting as a group, certificates of completion will have to be issued manually. Contact J. A. Montgomery Risk Control for blank certificates.
- 6. Completion of a brief course evaluation at the end would be appreciated.

#### Automated External Defibrillators (AED) in Public Settings

Early defibrillation is a key step in the Chain of Survival, after activation of the emergency response system and early CPR. According to the American Heart Association, immediate cardiopulmonary resuscitation (CPR) and early defibrillation, with an automated external defibrillator (AED), can more than double a victim's chance of survival. New Jersey has enacted a number of laws to make AEDs more available to professional rescuers and laypersons. As of January 2016, AEDs are required:

- o In airports & casinos
- In nursing homes & assisted living facilities
- o In health clubs
- In public and private K-12 schools and at public & private K-12 school athletic events and practices

These facilities are also required to have staff members trained in CPR and the use of the AED. Training must be conducted by an instructor of a training organization recognized by the N.J. Department of Health and Senior Services, such as the American Red Cross (ARC), American Heart Association (AHA), or American Safety & Health Institute (ASHI).

AEDs programs fall into two categories; User and Public Access. User Defibrillation Programs are needed when the AED is provided by an entity for use by authorized employees. Examples are the AEDs in police vehicles, fire apparatus, or health club. Public Access Defibrillation (PAD) Programs refer to the placement of the AED in a public space, such as a municipal building lobby, for use by nearby persons who are trained in CPR / AED.

Whichever program is warranted, a written program is needed that delineates roles and responsibilities for the AED's selection, use, and care (inspection and maintenance) (NJSA Title 34 2A:62A-25 par. 3). Requirements include:

- An AED is a medical device that must have medical oversight. The entity that provides the AED must consult with the prescribing physician when developing their program.
- AEDs must be registered with the local emergency service provider.
- Conduct at least monthly (the Safety Director recommends weekly) visual inspection of the readiness of the device and availability of ancillary equipment, such as rubber gloves, barrier breathing device, and razor. A sample inspection form is available on the MEL website, (www.njmel.org) under the SAFETY tab.
- The inspection should also verify the AED's battery and pads are not expired.
- Periodically checking for recall notices and program updates to current CPR guidelines.

To promote their wide-spread distribution and immediate use, New Jersey included strong immunities for persons or entities that prescribe, provide, train, and use an AED (NJSA Title 34 2A:62A-25 par. 5). The intent of lawmakers is clear. They recognized the lifesaving benefits of an immediately-available AED and provided the necessary immunities and guidance to encourage their placement in public settings where large numbers of residents, visitors, or spectators are anticipated.

## LAMENDOLA ASSOCIATES INC. MEMORANDUM

To: Dave Grubb

From: Clark LaMendola

Subject: Overview of MEL Commissioners Retreat 2/19/16

Date: 3/1/16

#### **Charge to the Participants**

Chairman Rheinhardt opened the session by summarizing the MEL's accomplishments and factors that contributed to the results. In particular he focused on the importance of the active involvement of Commissioners in the governance of the program.

Dave Grubb indicated that the challenge facing the MEL/RCF enterprise is to identify those strategic actions essential for it to continue to be the acknowledged leader in the provision of risk management and financing, responsive coverages, loss control and safety training. To do so, and to thrive, requires that MEL/RCF be ready to continually reinvent itself by identifying and responding to the challenges it faces, not only in the short-term, but also by forecasting those it will face in the longer term. The purpose of today's session is to identify those challenges.

#### **Challenges**

The presentations and discussions identified the following challenges that appear to be strategic in nature and require further consideration and action:

- Long term strategic planning is difficult to accomplish because of the short tenure and rapid turnover of local officials, who are key decision makers regarding MEL/RCF membership and whose primary concerns are often short term in nature based on election cycles.
- Because of the turnover in elected officials, key municipal employees and risk managers
  retained by public entities need information regarding the benefits of MEL/RCF
  membership that is packaged and available in formats that can be shared with elected
  officials on an ongoing, regular basis rather than only at the time of renewal.
- Because the current approach is that the MEL/RCF system is marketed at the JIF level, information regarding its benefits and accomplishments is unevenly available and varies in quality and scope.
- Competition is increasing and is more aggressive than in the past. It is amplified by the impact of taxpayer organizations questioning local bid processes and reinforces the need for increasing understanding of the MEL/RCF system and its benefits.
- Ease of accessibility to MEL and its products is a major factor in its competitive advantage.
   Continued investments in online accessibility to training and the full range of MEL developed products and coverages are essential.

- Although MEL risk management systems are now considered superior to competitors, a new generation of systems is on the horizon.
- State regulations limiting on investments is depriving JIF members of a significant return on assets. Currently, investment return is equivalent to only 6/10<sup>th</sup> %
- Collectively, however, the MEL/RCF asset base is currently \$450 million.
- MEL management of the Super Storm Sandy claims process demonstrated the power of the MEL/RCF system to produce exceptional results. The outcome was made possible because of MEL/RCF attributes: common ownership, trust, superior communication and problem solving skills, and collaboration.
- The cost of workers compensation claims is increasing, driven by medical and Rx costs. Of particular concern is the increase in law enforcement liability claims.
- Coverages require and are being given constant review in order to ensure responsiveness to member needs. Cyber security and drone coverages are demonstrations of the cutting edge responsiveness of MEL coverages.
- The outcome of the next gubernatorial election may increase the potential for legislation and regulatory changes that increase risk for MEL/RCF members. Chief among those risks is proposed legislation regarding cancer presumption for certain classes of public employees.
- Safety training and education offerings are essential to the effort to ensure low injury rates, increase awareness of MEL value, and differentiate it from competitors. Continued investment in ensuring quality, innovation and development of online accessibility will be required. Current offerings are comprehensive, well attended, and highly valued. Movement toward online training offerings is aggressive. Major efforts to increase training regarding cyber security and working collaboratively with public safety are being given priority.

#### **Observations**

The major challenges facing MEL in both the short and long range appear to be centered on developing a more robust marketing effort, continuing its effort to modify state regulations that limit its investment potential and developing strategies regarding pending legislation to moderate its impact on MEL exposures. Following are suggestions regarding actions that could be considered to address these challenges.

- 1. Develop a formal marketing plan that identifies target audiences, products, channels of communication, and strategies for increasing awareness, support and understanding. The plan should include a standard format and message strategy for use by local JIFs perhaps in the form of marketing "tool kit". The benefits of the MEL/RCF system should be the foundation for these information tools.
- 2. Increase investment in marketing at the MEL level by providing tools and professional expertise to JIFs needed to increase awareness and support from local elected officials. Tools could include information packets, development of a periodic newsletter emailed and hard

copy to the local governing body members, continuation of the MEL sponsored advertisement programs, development of a JIF annual report format that could be used to brief governing bodies.

- 3. Increase formal training and orientation opportunities for risk managers.
- 4. Increase training opportunities for elected officials.
- 5. Give priority to developing compromises that could be negotiated relative to legislative proposals regarding cancer presumption.
- 6. Increase efforts to modify regulations inhibiting the investment potential of MEL/RCF.
- 7. Conduct a formal review of information systems now becoming available to ensure that MEL approach remains cutting edge.
- 8. Continue current efforts to ensure that coverages are responsive, and that training is focused on development of a community-wide accident free culture. Increase public awareness of the value of these efforts.

To operationalize any of these suggestions, it might be useful for the MEL staff to develop specific, multi-year work plans that state goals and identify the major action steps required to achieve those goals.

Thanks again for the opportunity to participate and to comment.

# Environmental Alert

#### THE HIDDEN COST OF FREE PROPERTY

With NJ residents still recovering from Super Storm Sandy, coupled by a still struggling economy, many of our municipalities are dealing with a significant number of tax liens and foreclosures. Acquiring properties through foredosure, or even a donation, should be approached cautiously. Properties, as they appear today, may look very different than they did many years ago and may have environmental liabilities which far exceed their assessed value. Many areas of our state have significant industrial history or historical agricultural use, both of which come with potential environmental concerns. Even a property that has always been used as a residence can have pesticide residues or impacts from a current or former underground storage tank. Prior to the acquisition of any property, the performance of proper due diligence is imperative to understanding the environmental issues associated with that property and to obtain protection from its liabilities.

Under the Federal Comprehensive Environmental Response, Compensation and Liability Act (CERCLA), a prospective purchaser must perform a Phase I Environmental Site Assessment (Phase I or ESA) in accordance with the ASTM standards to gain protection as a bona fide prospective purchaser. In addition, in NJ a purchaser must also complete a Preliminary Assessment (PA) to be afforded protection (the innocent purchaser's defense) under the NJ Spill Compensation and Control Act (Spill Act). Although these efforts are similar, there are some minor differences as it relates to performing environmental due diligence to identify areas of environmental concern prior to purchase. Without the completion of the above due diligence, environmental liabilities can be assessed to both the former owners as well as the new owner.

As an included service with your membership, the EJIF's environmental consultants can assist you with the initial steps of property acquisition. The EJIF's consultant will perform a visual site inspection of the property to identify indicators of environmental concern, as well as utilize NJDEP DataMiner and iMapNJ services to review documented environmental concerns for the prospective property and its contiguous properties. Although these services do not comply with the full due diligence requirements under CERCLA or the Spill Act, they do provide an initial analysis of the risk associated with the parcel, that can assist your municipality with making a decision to further investigate the parcel or to terminate the inquiry. In add ition, the EJIF excludes previously contaminated property and the use of this service is a good first step in the event you choose to move forward with the acquisition and require separate environmental implairment insurance.

If you are in a position of evaluating a property for acquisition, the EJIF urges you to contact your Risk Manager and our consult ants to as sist you with the initial assessments.
